

Security Envelopes

Versapak polythene security bags provide a simple single-use method of securely storing or transferring documents, cash or other items.

Key Features:

- Tamper evident, easy to use closure seal
- A STOP/VOID message shows any attempt at tampering
- Each bag is printed with a unique sequential number and a barcode (2 of 5) for track and trace

Dimensions

Size 1 Internal size (mm): 177 x 335 + 1 receipt

Size 2 Internal size (mm): 260 x 415 + 1 receipt

Tamper Evident Labels

Versapak security labels are quick and easy to apply and leave a clearly visible security VOID message when it is peeled off. They are used for many applications from protecting confidential documents or valuable equipment to securing vehicle doors. They are very user friendly and have a matt surface for writing.

Dimensions

Versapak Void Label (Small): 60 x 20mm

Versapak Void Label (Large): 85 x 40mm

Customised Products

For large quantities we are able to customise our security seals and envelopes. You may want to add your company name or a barcode or number sequence of your choice. For more information please contact us.

Versapak Pouches and Bags

Versapak pouches and bags are used around the world by individuals, private companies and the public sector for reasons as diverse as protecting blood samples, securing important documents, storing votes for elections and handling cash.

- Simple and user friendly tamper evident sealing system
- A cost effective solution, our bags are reusable over 2,000 times
- All sewn bags come with a 5 year guarantee
- Made from strong and durable materials, our bags are tear and burst resistant
- Weather resistant material protects the contents

Versapak bags are sealed using one of our security seals as shown below. These seals are supplied either plain, printed with a unique 6 digit number, barcoded, or personalised with your company information. Visit www.versapak.co.uk for more information.

Security Seals

Tamper Evident Labels

Security Envelopes

As part of Versapak's vast range of tamper evident security products, we stock a selection of disposable seals and envelopes intended for single use. The tamper evident security seals and locks we supply are designed for a range of security sealing applications, from fire extinguishers to shipping containers.

Why Use Security Seals?

Versapak's security seals are used to provide an indication of tampering and act as a deterrent against unauthorised access. Using a security seal will help you to ensure the integrity of goods or equipment. They also deter unauthorised entry or handling of your products.

VersaLite Variable Length Security Seal

The VersaLite is a variable length security seal and it was developed primarily for fire extinguishers. It is designed to have a deliberately low breaking strength for easy removal in emergencies. Each seal is printed with a unique number for identification purposes.

Dimensions
Length: 220mm
Stem width: 2.6mm
Tag: 21.3 x 33.5mm

VersaCheck Fixed Length Seal

The VersaCheck is a fixed length security seal and is predominantly used for vehicle doors, tankers, shipping containers and fire doors. The seal allows movement of the door locking mechanism without straining the seal. It has a fixed loop design and each seal is uniquely numbered. The seals have a patented double locking mechanism and a pre-determined break point. They are user friendly with easy removal by hand.

Dimensions
Length: 200mm
Stem width: 9mm

VersaTite Variable Length Security Seal

The VersaTite security seal locking system is designed with a spiky stem for better grip on slippery items, or items that need to be sealed outside making this security seal ideal for more robust applications. It is easily removed by hand and is printed with a unique number for identification purposes.

Dimensions
Length: 350mm
Width: 3.6mm
Tag: 50 x 3mm

VersaPull Metal Insert Security Seal

The VersaPull has multiple uses from courier bags to vehicle doors and shipping containers. It is user friendly and is easy to remove requiring no tools and each seal is printed with a unique number for identification purposes. The VersaPull has a stainless steel spring locking mechanism and it has a smooth strap and side tear off option.

| VersaPull 200 | VersaPull 330 |
| Length: 200mm | Length: 330mm |
| Diameter: 2.2mm | Diameter: 2.2mm |
| Tag Size: 55 x 18mm | Tag Size: 55 x 23mm |

VersaLock Variable Length Security Seal

VersaLock security seals can be used to secure courier bags, cash bags, security containers and even freight tankers. It is a variable length security seal and has a metal insert locking jaw for extra strength. The VersaLock has a stainless steel spring locking mechanism and a polypropylene body with a smooth strap. Each seal is printed with a unique number for identification purposes.

Dimensions
Length: 250mm
Stem width: 5mm
Tag: 30 x 50mm

VersaCart Fixed Length Security Lock

The VersaCart is a padlock-shaped security seal designed to fit into the recess of a trolley or container and it is very popular with airlines for their food and duty free trolleys. It is fitted with an acetal locking mechanism and is easy to apply and secure with one hand. Each seal is printed with a unique number.

Dimensions
Tag: 23 x 15mm
Maximum locking distance: 22.5mm

VersaCab Medium Metal Barrier Seal

The VersaCab security seal is a high security steel cable, which is designed for the security of high value goods and the storage of valuables over long periods of time. It is made from non-preformed galvanised steel cable which unravels when cut. Each seal is printed with a unique number and is removable only with a tool.

Dimensions
Length: 300mm
Diameter: 2mm

VersaBolt Barrier Seal

This high security bolt seal is made of high quality ABS material to withstand impact and reveal evidence of tampering. They are mostly used to secure vehicle doors and shipping containers. Each seal is uniquely numbered for enhanced security and they are suitable for temperatures ranging from -40°C to 110°C. They require a bolt cutter for removal.
